

ONESIGN ANYWHERE™

ANYWHERE, ANYTIME SECURE SINGLE SIGN-ON

ANYWHERE, ANYTIME AUTHENTICATION AND ACCESS

Today's increasingly mobile workforce requires simple and secure access to business applications and data. Imprivata OneSign Anywhere extends the benefits of the Imprivata OneSign® strong authentication and single sign-on solution to remote and mobile users—from a variety of endpoint devices.

ANYWHERE ACCESS TO REAL-TIME BUSINESS INFORMATION

Mobile access is increasingly common in many business environments. Some employees and contractors are often off-premise, at remote sites, or traveling. Also, if users are accustomed to single sign-on, then they are less likely to remember rarely-used passwords and logins when away from the office—resulting in helpdesk calls.

Imprivata OneSign Anywhere gives road warriors, telecommuters and at-home workers the same, consistent single sign-on experience they receive in the office using Imprivata OneSign, no matter where they are. All they need is an Internet connection to gain simple, remote single sign-on access to real time critical business information and applications.

OneSign Anywhere also supports a number of strong authentication options including hardware tokens, soft tokens and phone based authentication (Phonefactor) to ensure that data is secure.

As OneSign Anywhere builds on the Imprivata OneSign credential store, IT still has a single point of management for all network authentication and application password management that integrates with their existing directories—reducing costs for IT while delivering a great experience to the user.

BE PRODUCTIVE WITH ANY DEVICE

OneSign Anywhere does not require any agent installation or software on the client other than a browser, enabling users to use the most appropriate device, whenever they need access to business information. Moreover, as the IT team does not need to specifically provision or configure devices for remote access, users can take advantage of the newest technologies without requiring IT support.

OneSign Anywhere provides users with secure access using any device with a browser, including:

- Windows
- Mac OS
- Apple iPhone and iPad
- Linux

BENEFITS

- Secure, remote single sign-on access to critical business applications and information—enabling timely business decisions
- Agentless support for mobile devices such as iPads and iPhones, and home or clinical office computers
- Single point of strong authentication and password management for all internal and external users and applications (web, Citrix XenApp, Microsoft RDS)
- Demonstrates compliance with corporate, security or regulatory policies

COMPLIANCE FOR MOBILE ACCESS

By building on the Imprivata OneSign credential store as a single point of authentication and password management for all internal and external users, OneSign Anywhere enforces the same access and authentication policies for application and data access both inside and outside of the office—improving end-user compliance.

OneSign Anywhere enables secure access by ensuring that endpoints meet specific security compliance including anti-virus and browser versions.

OneSign Anywhere automates the process of ensuring compliance with corporate regulations and controls with:

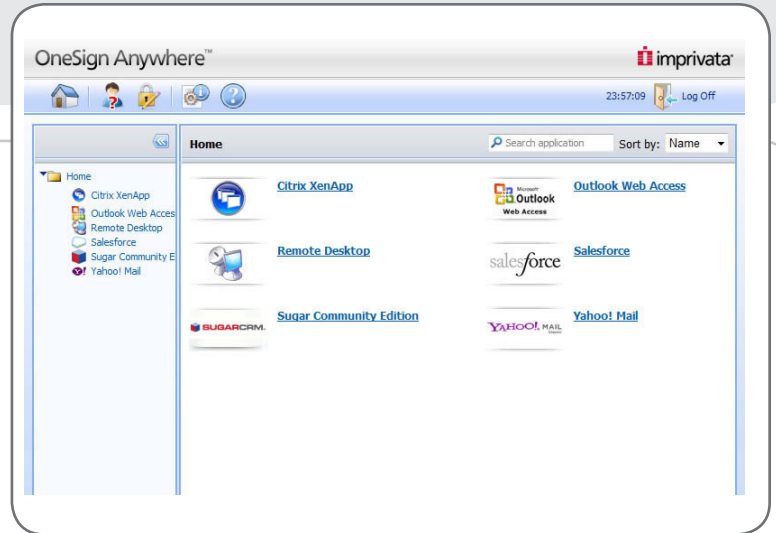

- Flexible strong authentication options for mobile users
- Audit reporting for remote and internal access
- Centralized policy management for remote and internal employees
- Transaction-level authentication

THE IMPRIVATA ONESIGN PLATFORM

With more than one million users, Imprivata is the #1 independent provider of single sign-on and access management solutions.

By strengthening user authentication, streamlining application access and simplifying compliance reporting across multiple computing environments, customers realize improved workflows, increased security and compliance with government regulations.

Imprivata has received numerous product awards and top review ratings from leading industry publications and analysts, including a Strong Positive rating in Gartner's 2010 ESSO Marketscope, the #1 ranking in the KLAS SSO Performance report and the #1 rating in 2010 Best in KLAS and Category Leaders report.

Headquartered in Lexington, Mass., Imprivata partners with over 200 resellers, and serves the access security needs of more than 1,200 customers around the world. For more information, please visit www.imprivata.com.

Securing employee access to desktops, networks, applications and transactions from around the world.
